

CCSBT-EC/2110/07

Review of SBT Fisheries and ERS Interactions

Purpose

To provide an opportunity for discussion by Members on recent activities in the fishery.

Background

All Members are requested to provide annual reports to the Compliance Committee and the Extended Commission in accordance with the template agreed at CC 14 and adopted at CCSBT 26, which is available at:

https://www.ccsbt.org/userfiles/file/templates/Annual_CC-EC_Reporting_Template.docx

At the meeting, the annual reports will be assumed to have been read. This agenda item is for questions, comments and follow-up discussion in relation to the reports.

The reports for this agenda item are provided as “CCSBT-CC/2110/SBT Fisheries” in the meeting document list.

In addition to the general review of SBT fisheries, a sub-agenda item has been included for Members to report on any projects they have conducted and for subsequent discussion in relation to these projects. This may include:

- A report by Australia on any trials it has conducted on automated stereo video; and
- A report by Japan on progress with its proposal to verify the catch of all Members, including work proposed for 2022 and associated costs for the CCSBT.
 - In addition, the Extended Commission will decide on the external expert who will conduct parts of this work.
