### Annexes

- Annex 1: List of Participants
- Annex 2: Facilitation PowerPoint presentation, including meeting conclusion
- Annex 3: Report of the OMMP Technical Webinar on incorporation of half-sibling pairs in the CCSBT OMs for the 2017 update of stock status

### Chat Log of Web Discussion (20/21 July)

*At this webinar, all of the discussion was conducted using live audio. The chat log (below) is therefore only an incomplete record of the discussion. The best record of discussion and outcomes is a combination of the video/audio log of the meeting together with the chat log. Please also note that the chat log has been amended to correct some typographical errors and to remove greetings and administrative comments.*

**Jim Ianelli:** Jim asked about definition of PLOD (Pseudo Log Odds Difference)

**Jim Ianelli:** Doug asked about subset vs total population sampling

**Jim Ianelli:** Point made that lower steepness values crashed for some runs so a value of 0.62 was used for this meeting in place of 0.60
