

CCSBT-EC/0810/11

Integrated Monitoring, Control and Surveillance System

Purpose

To consider implementation of integrated monitoring, Control and surveillance systems.

Discussion

At CCSBT13 in October 2006, the Extended Commission adopted three resolutions to implement three compliance measures:

- a catch documentation scheme
- a vessel monitoring system
- regulation of transshipments by large scale fishing vessels

Agreement was not reached at CCSBT14 in October 2007 on the implementation arrangements for the three measures.

The Compliance Committee's report will include discussion of implementation issues.

Australia and New Zealand have submitted fourteen papers for consideration under this agenda item – CCSBT-EC/0810/BGD07 to BGD20.
