Global markets for southern bluefin tuna: Principles for an analysis of established, expanding and emerging markets

K. Phillips

Working Paper CCSBT-ESC/1107/22 prepared for the Sixteenth Meeting of the
Extended Scientific Committee (ESC16) of the Commission for the Conservation of Southern Bluefin
Tuna, 19–28 July 2011, Bali, Indonesia

The Australian Government acting through the Bureau of Rural Sciences has exercised due care and skill in the preparation and compilation of the information and data set out in this publication. Notwithstanding, the Bureau of Rural Sciences, its employees and advisers disclaim all liability, including liability for negligence, for any loss, damage, injury, expense or cost incurred by any person as a result of accessing, using or relying upon any of the information or data set out in this publication to the maximum extent permitted by law.

BACKGROUND

At its annual meeting in October 2010, the Commission for the Conservation of Southern Bluefin Tuna (CCSBT) Compliance Committee noted that the expansion of markets for southern bluefin tuna (SBT) posed a risk to CCSBT management measures, including decisions on the global total allowable catch and the effectiveness of the catch documentation scheme (CDS).

It was agreed that members, particularly Japan and Australia, would work intersessionally to develop methods of market analyses based on CDS data, trade data and public data from the markets. The outcomes of the inter-sessional work, with a design on how CCSBT would use these data in the future, would be reported to the Extended Scientific Committee and the Compliance Committee in 2011.

PURPOSE

Attempting to estimate total quantities of SBT product traded, auctioned through markets and sold off-market is an imprecise science if the analyses are reliant on information available through public websites or compliance data submitted to the CCSBT Secretariat. Studies such as the ‘2006 *Independent Review of Japanese SBT Market Data*’ require specific information gathered from individual markets at different stages along the supply chain; information that is not publicly available and must be updated over time. Rather than attempt to replicate an analysis of individual markets for the purpose of comparing reported catches against quantities auctioned or sold off-market, the overarching objective of this proposal is to provide CCSBT members with a gauge of whether significant breaches of CCSBT obligations by members and cooperating non-members (CNMs) are occurring, and whether trade by non-members is indicative of fishing by non-members.

To achieve this objective, the market analyses will provide CCSBT with annual updates on:

1. estimates of the quantity of SBT product traded around the globe
2. estimates of the quantity of SBT consumed domestically in established and expanding markets
3. trends in emerging markets.

SCOPE

In producing the three annual updates above, it is anticipated that analyses will include:

- an estimate of domestic consumption in Japan, the main established market, with a breakdown of the proportion derived from domestic landings and the proportion derived from imports, and a breakdown of auctioned and non-auctioned
- an estimate of domestic consumption in expanding markets, particularly China, Taiwan and Korea, with a breakdown of the proportion derived from domestic landings and the proportion derived from imports
- the identification of any systematic discrepancies in members' reported annual figures on exports, imports, re-exports and domestic landings through the CCSBT CDS
- the identification of any systematic discrepancies between countries' reported exports and trading partners' reported imports in trade statistics databases
- an assessment of whether trade by non-members has derived from fishing by non-members.

AVAILABLE INFORMATION

Unless CCSBT members decide to commission additional research on the supply chains of individual markets, the existing data available to CCSBT members to meet the objective of this market study can be separated into three categories: (1) compliance data submitted by members/CNMs to the CCSBT Secretariat; (2) trade statistics accessible through online trade databases; and (3) Japanese auction data available online or through industry newspapers.

Note that online databases of trade statistics contain information on trade by some CCSBT members and CNMs that was not reported through the CCSBT Trade Information Scheme. This may in some cases stem from non-compliance with CCSBT reporting requirements by CCSBT members/CNMs, but in other cases will result from errors in an individual trade database, for example due to errors in the data entry of Harmonised System (HS) commodity codes.

1. *Compliance data submitted by members/CNMs to the CCSBT Secretariat*
 - annual summaries of member/CNM quarterly reports on exports, re-exports, imports and domestic landings submitted through the CCSBT CDS
 - member/CNM reported catches.

2. *Trade statistics through online trade databases*

Two options are available for sourcing trade statistics through online databases. The first is to access individual trade databases listed in Table 1, some of which require a subscription.

The second option would be for the CCSBT to take out a single subscription to trade data through the Global Trade Information Services (www.gtis.com). The GTI database sources data from all of the databases listed in Table 1. The advantages of this option are:

- trade data are available for a larger number of reporting countries than can be accessed through individual trade databases

- the time required for data extraction and compilation is greatly reduced
- GTI can provide additional information on processed product beyond the two HS codes listed in most online databases (HS 030236 and 030346). The additional codes for processed product as reported by individual countries are provided in Appendix 1
- GTI is able to make enquiries about potential discrepancies in trade data at the request of CCSBT members (e.g. if an incorrect HS code is suspected as being the source of unusual trade in SBT)
- a large amount of historical data is available through the tool.

GTI has provided sample data on all countries reporting trade in two SBT commodities (HS 030236: fresh, chilled SBT excluding filleted product; and 030346: frozen SBT excluding filleted product) over the period 2008–10 (Appendix 2). The information in Appendix 2 is given as the value of SBT traded, but weights are also available on subscription. Annual subscriptions range from US\$400 for trade in two HS codes for five countries, to US\$1000 for trade in two HS codes by 25 countries. A quote would need to be obtained if additional HS codes were required to track trade in processed product by individual countries.

3. Japanese auction data

Auction data can be used to estimate the quantity of SBT consumed by a market within a specific time period (as differentiated from the quantity that might be held in cold storage over that period) and, in some cases, may provide additional information on the consumption of product landed domestically versus imported product. At present, such data only appear to be available for the Japanese market (Table 2).

A supplementary source of information that could be used as a basic ‘indicator’ of bluefin trade is the quantity of bluefin (northern and southern combined) remaining in cold storage at month’s end in Japan. Specific data for SBT are available and any unusual fluctuations in the quantities held in cold storage may indicate a change in the trade of bluefin tuna, such as the diversion of product to emerging markets.

Table 1. Online trade databases listing trade (import, export) in SBT¹

Source	Description	Subscription required?	Pros	Cons
Trade Statistics of Japan (www.customs.go.jp/toukei/info/index_e.htm)	comprehensive trade statistics for Japan's imports/exports for 6 SBT commodity codes, including processed ² products	N	one of only two databases to provide information on processed product exempt from tagging under the CDS	no information on direct trade between other countries
Australian Bureau of Statistics (www.abs.gov.au)	trade statistics for Australia's imports/exports for 2 SBT commodity codes	Y	Department of Agriculture, Fisheries and Forestry holds a subscription	no information on direct trade between other countries. No statistics available for processed product
Statistics New Zealand (http://www.stats.govt.nz/infoshare)	trade statistics for New Zealand's imports/exports for 3 SBT commodity codes, including processed product	N	one of only two databases to provide information on processed product exempt from tagging under the CDS	no information on direct trade between other countries
Korea International Trade Association (http://global.kita.net/)	trade statistics for the Republic of Korea's imports/exports for 2 SBT commodity codes	N		no information on direct trade between other countries. No statistics available for processed product
Taiwan Bureau of Foreign Trade (http://eweb.trade.gov.tw)	trade statistics for the Taiwan's imports/exports for 2 SBT commodity codes	N		no information on direct trade between other countries. No statistics available for processed product
South African Trade Statistics (www.dti.gov.za)	trade statistics for the South Africa's imports/exports for 2 SBT commodity codes	N		no information on direct trade between other countries. No statistics available for processed

¹ All databases listed in Table 1 provide some information on SBT trade

² For the purposes of this document, 'processed product' includes fresh and frozen fillets and other portions exempt from tagging under the CCSBT CDS

				product
ComTrade (http://comtrade.un.org)	statistics for all reported trade between UN countries for 2 SBT commodity codes	Y	Department of Agriculture, Fisheries and Forestry holds a subscription	no statistics available for Taiwan. No statistics available for processed product
China Customs Statistical Information Service (www.eiahk.com/consult_e.html)	trade statistics for import/exports for the Republic of China for 2 SBT commodity codes	Y	Provides trade information for a non-member state	no information on direct trade between other countries. No statistics available for processed product
United States Foreign Agricultural Service (www.fas.usda.gov/gats/ExpressQuery1.aspx)	trade statistics for import/exports for the United States for 2 SBT commodity codes	N	Provides trade information for a non-member state	no information on direct trade between other countries. No statistics available for processed product
Thailand Customs Department (www.customs.go.th/Customs-Eng/indexEng.jsp)	trade statistics for import/exports for Thailand for 2 SBT commodity codes	N	provides trade information for a non-member state, including trade with CCSBT members not reported through the CCSBT Trade Information Scheme	no information on direct trade between other countries. No statistics available for processed product. Provides monetary value but not quantity (weight) of traded product

Table 2. Japanese auction data

Source	Description	Subscription required?	Pros	Cons
Tokyo Metropolitan Central Wholesale Market statistics (Tsukiji, Ohta, Adachi) (www.shijou-tokei.metro.tokyo.jp/asp/rmenu.aspx?mode=2); Yaizu market (www.yaizu-gyokyo.or.jp/)	monthly auction statistics for fresh (imported vs. domestic) and frozen SBT, including processed product	N	public data on Japan's largest market	origin of frozen product (imported vs. domestic) not available
Fisheries Agency of Japan monthly monitoring at Tsukiji market	information on origin of frozen product (imported vs. domestic, and wild frozen vs. farmed frozen); number of SBT with catch monitoring tags; and time lag between catch and auction at market	N	unique source of information on product origin and time lag between catch and auction	information not publicly available; monthly snapshot of one market only; does not separate auction and non-auction sales
Industry newspapers (Jiji Press, Nikkan Shokuryo Shinbun)	auction statistics for a number of Japanese markets	Y	auction statistics for all major markets selling SBT; both tonnage and fish numbers available	subscription required

FROM HERE ON IN

Australia seeks the support of other members on the purpose and scope of this proposed analysis of established, expanding and emerging markets. Members must then agree which data sources to use in the study and, if additional subscriptions to trade statistics databases are required, whether these subscriptions will be incorporated into the CCSBT general budget.

Australia then seeks to agree to a workplan among members for producing the information outlined in the purpose and scope of this proposal.

Task	Developed by who? Timeframe?	Endorsed by who? Timeframe?	Results to be reported to which body? Timeframe?
<i>Annual updates</i>			
Estimating quantity of product traded around globe			
Estimating quantity consumed domestically in established and expanding markets			
Trends in emerging markets			
<i>Component analyses</i>			
Estimating domestic consumption in Japan			
Estimating domestic consumption in expanding markets, particularly China, Taiwan, Korea			
Identifying any systematic discrepancies in members' reported CDS figures			
Identifying any systematic discrepancies between trading partners in trade statistics databases			
Identifying any systematic errors in trade statistics databases through cross-checking among databases			
Assessing whether trade by non-members has derived from fishing by non-members			

Acknowledgements. Global Trade Information Services are gratefully acknowledged for providing the product codes and sample trade data shown in appendices 1&2.
