

CCSBT-EC/2210/05

DRAFT REVISED 2022 BUDGET

Purpose

To agree a revised budget for 2022.

Discussion

A draft revised budget for 2022 is provided at **Attachment A**. The revision incorporates actual income and expenditure as of 5 September 2022 together with forecast income and expenditure for the remainder of the year.

With the exception of Korea, all Members have paid their 2022 contributions to the CCSBT in full. The draft revised budget for 2022 assumes that Korea's outstanding payment of \$63,925.94 for its 2022 contribution to the CCSBT will be made during 2022.

Given the above assumption, the forecast final income and expenditure for 2022 is provided at **Attachment A**.

The variations in income for 2022 from that approved by CCSBT 28 were:

- Increased returns of \$15,694 from the Staff Assessment Levy¹.
- Increased returns on investments of \$14,015 due to improved interest rates midway through 2022.
- Reduced withdrawal of savings (from \$43,609 to zero) because reductions in expenditure meant this withdrawal was not required.
- A \$176,931 increase in the carryover of funds from 2021 to 2022 (from \$612,027 to \$788,958). This increase was due to a rollover of funds from the five following projects in 2021²:
 - Market Analysis: Members agreed that any unused funds for the Market Analysis project at the end of 2021 could be carried forward for additional work that may be required in 2022. At total of \$39,200 was carried forward for this purpose, but most of this will not be used.
 - o Trial eCDS development. Due mainly to limited availability of developer time, \$28,670 remained unspent at the end of 2021 and was carried forward to 2022. Again, most of this carryover will not be used in 2022.
 - O The contractor (CSIRO) for the Close-kin and Indonesian otoliths projects was not able to conduct all the contracted work in 2021 due to COVID-19 restrictions. Most of this work is being conducted in 2022 instead. This has involved carryovers from 2021 to 2022 of \$60,415 for Close-kin sampling, \$22,039 for Close-kin identification and \$26,607 for sampling and aging of Indonesian otoliths.

¹ The Staff Assessment Levy appears on both the income and expenditure side of the budget, so it has no net effect.

² These rolled-over/unspent amounts were reported to Members in the CCSBT's annual Financial Statements (Circular #2022/014, Attachment B, page 17).

The forecast final total expenditure for 2022 is about \$42,000 lower than the amount forecast in the interim draft revised budget provided in Circular #2022/042³.

The total expenditure for 2022 is forecast to be approximately \$3,181,000, which is a ~\$470,000 (12.9%) decrease on the amount of \$3,651,000 approved for 2022. Savings are forecast across all seven expenditure areas of the budget.

The reduced expenditure in 2022 from the approved budget for 2022 occurred for the following main reasons, the most significant of which were a consequence of the COVID-19 pandemic:

- 1. Replacement of most physical CCSBT meetings with virtual meetings;
- 2. Reduced costs for the ERSWG and OMMP meetings;
- 3. Rescheduling most of the OMMP maintenance and development work to 2023;
- 4. Reduction in the cost of the CPUE series development;
- 5. Cancelling the CCSBT funding for the Maturity study because CSIRO was able to conduct this work from its own resources;
- 6. Reduction in the final costs for the Performance Review; and
- 7. Cancellation of all Secretariat travel.

The minor increases in expenditure for the market analysis and trial eCDS development, and the larger increases for the close-kin projects and work on Indonesian otoliths have no cost implications for the Extended Commission because funding was carried forward from 2021 to 2022 for these projects as explained above in relation to income.

The draft revised budget for 2022 provides a carry forward of \$633,322 from 2022 to 2023.

The Extended Commission is invited to consider the forecast final income and expenditure in **Attachment A** for the revised budget for 2022.

Prepared by the Secretariat

³ Due mainly to: No external translation required for ESC27, CC17 and CCSBT 29 meeting documents; additional savings for the OMMP 12 meeting; completion of most CPUE development work for 2022 (the remaining work, if approved, will be conducted in 2023); and slightly reduced Secretariat costs.

	2022
