

CCSBT-EC/0910/09 rev1

INTEGRATED MONITORING, CONTROL AND SURVEILLANCE SYSTEM

Purpose

To consider progress in implementation of integrated monitoring, Control and surveillance systems.

Discussion

At CCSBT15 in October 2008, the Extended Commission adopted resolutions to implement four compliance measures:

- A Catch Documentation Scheme.
- A Vessel Monitoring System.
- Regulation of Transshipments by large scale fishing vessels.
- A Record of Authorised Farms.

The Compliance Committee will be considering final matters in relation to the Catch Documentation Scheme, which is scheduled to commence on 1 January 2010.

The Compliance Committee will also consider progress and issues in relation to implementation and operation of the Vessel Monitoring System, the regulation of Transshipments and the Record of Authorised Farms, which came into effect in October 2008, April 2009, and December 2008 respectively.

Recommendations may be made on these matters, which will require the attention of the Extended Commission.
